André Choulika  
Chief Executive Officer

## Collectis Provides Business Update and Reports Financial Results for Second Quarter and First Six Months 2021

- Preliminary translational data validate UCARTCS1 as a promising potential therapy for relapsed or refractory multiple myeloma patients.
- Preclinical pipeline disclosed at Innovation Days : UCART20x22 for B-cell malignancies, UCARTMESO (targeting mesothelin), and TALGlobin01 (Sickle Cell Disease)
- First mRNA batches and UCART training runs successfully completed in our proprietary GMP facilities
- Cash position<sup>1</sup> of \$257 million as of June 30, 2021. Cash runway into 2023

NEW YORK, Aug. 05, 2021 (GLOBE NEWSWIRE) -- Collectis S.A. (NASDAQ: CLLS – EURONEXT GROWTH: ALCLS) (the “Company”), a gene-editing platform company with clinical-stage immuno-oncology programs using allogeneic chimeric antigen receptor (CAR) T-cells and gene therapy programs for genetic diseases, today announced results for the three-month and first six-month periods ending June 30, 2021.

Collectis will hold a conference call for investors on Friday, August 6, 2021, at 8:00 AM ET / 2:00 PM CET. The call will include the Company’s second quarter results, and an update on business activities.

The live dial-in information for the conference call is:

US & Canada only: +1 877-407-3104

International: +1 201-493-6792

In addition, a replay of the call will be available until August 20<sup>th</sup>, by calling +1 877-660-6853 (Toll Free US & Canada); +1 201-612-7415 (Toll Free International).

Conference ID: 13721394

“To date, more than 120 patients have been treated with allogeneic CAR-T cells utilizing technology developed by Collectis, both in Collectis-sponsored clinical studies and those of our license partners Allogene and Servier. We continue to advance all of our UCART programs and, with the announcement of exciting new preclinical programs, we are now targeting solid tumors. These updates clearly show our potential and ability to advance the field of allogeneic CAR-T cell therapy. Furthermore, we announced .HEAL, our novel gene therapy platform to address genetic diseases. Over the coming months, we also plan to expand our internal manufacturing capabilities to strengthen our manufacturing autonomy. We will present clinical and translational data at forthcoming scientific conferences as our clinical stage programs continue to advance. Finally, we are assessing different strategies in the Company deployment of the current structure and finance.” said Dr. André Choulaka, CEO of Collectis.

---

<sup>1</sup> Cash position includes cash, cash equivalent, current financial assets and restricted cash

### **Allogeneic CAR T-Cell Development Programs**

#### ***Sponsored Phase 1 Studies***

Collectis continues to make progress, enrolling patients throughout its three sponsored Phase 1 dose escalation trials:

- UCART22 is an allogeneic CAR T-cell product candidate for patients with relapsed or refractory B cell acute lymphoblastic leukemia (r/r B-ALL)
- UCART123 is an allogeneic CAR T-cell product candidate for patients with relapsed or refractory acute myeloid leukemia (r/r AML)
- UCARTCS1 is an allogeneic CAR T-cell product candidate for patients with relapsed or refractory multiple myeloma (r/r MM)
  - Collectis presented preliminary translational data from the first group of patients enrolled in the MELANI-01 trial of UCARTCS1 at the virtual American Society of Gene and Cell Therapy (ASGCT) 24<sup>th</sup> annual meeting.
  - Early preliminary data validates CS1 as a target for allogeneic CAR-T cells in r/r MM. UCARTCS1 expansion and persistence was observed and correlated with changes in relevant serum cytokines and anti-myeloma activity.
  - The MELANI-01 trial is currently enrolling patients at dose level -1, the first of three planned dose levels.

#### ***Wholly-controlled UCART Preclinical Programs***

Collectis hosted a virtual event called Collectis Innovation Days, that took place May 24-28, 2021. The event provided an inside look at the Company’s current and new product candidate pipeline, manufacturing capabilities, and proprietary technologies,

including four new UCART preclinical programs targeting B-cell lymphomas and solid tumors. These wholly-owned immunology programs include:

- UCART20x22, which is in development as the first allogeneic dual CAR T-cell product candidate for B-cell malignancies;
- UCARTMESO, which is an allogeneic CAR T-cell product candidate for mesothelin expressing solid tumors ;
- UCARTMUC1, which is an allogeneic CAR T-cell product candidate for mucin-1 expressing epithelial cancers;
- UCARTFAP, which is an allogeneic CAR-T product candidate targeting cancer associated fibroblasts (CAFs) in the tumor microenvironment.

Collectis continues to build its UCART pipeline and advance product candidates with industry leading partners. Collectis anticipates the filing of two investigational new drug (IND) applications for UCART20x22 and UCARTMESO in 2022.

### **Gene Therapy Programs**

.HEAL is a new gene therapy platform for genetic diseases developed by Collectis. The platform leverages the power of TALEN<sup>®</sup> gene editing technology to perform genome surgery resulting in highly efficient and precise gene inactivation, insertion, and correction in hematopoietic stem cells (HSCs). Collectis has announced programs in sickle cell disease, lysosomal storage disorders and primary immunodeficiencies. More information is available in replays of Collectis' Innovation Days, available here.

#### ***Sickle Cell Disease (SCD)***

.HEAL's lead product candidate is TALGlobin01, an autologous ex vivo TALEN<sup>®</sup>-edited CD34+ HSC therapy for the treatment of SCD. TALGlobin01 is developed using both TALEN<sup>®</sup> technology to induce a double strand DNA break in the SCD-causing hemoglobin subunit beta (*HBB*) gene and adeno-associated virus (AAV) particles containing a DNA repair template designed to correct the faulty *HBB* gene via endogenous homology directed repair. Collectis plans to file an IND for TALGlobin01 in 2022.

#### ***Lysosomal storage disorders (LSDs)***

. LSDs are rare disorders in which enzymes that contribute to normal breakdown of lipids (fats) or carbohydrates (sugars) inside cells lose function or are lacking due to genetic mutations. The accumulation, or storage, of cell byproducts leads to cell toxicity and organ damage. There are more than 50 LSDs which have a variety of symptoms including impaired organ function or neurological complications. Collectis has developed an artificial exon strategy (ArtEx) to introduce a corrected gene copy coding for an LSD enzyme into the genome of myeloid cells without affecting endogenous gene expression. This approach would avoid the potential collateral effect of knocking out the endogenous gene without a correct replacement.

This editing strategy opens new avenues for the treatment of LSDs, as it would allow to address the systemic lack of lysosomal enzyme activity, including in the brain, and could be used to produce virtually any defective LSD enzyme. It represents a new platform, in which a single and well characterized TALEN<sup>®</sup> could be used to treat different LSDs.

#### ***Primary Immunodeficiencies***

In collaboration with Professor Toni Cathomen, scientific director at the Center for Chronic Immunodeficiency, Medical Center - University of Freiburg, Germany, Collectis is developing two gene edited HSC product candidates to address primary immunodeficiencies:

##### **RAG1 Severe Combined Immunodeficiency (SCID)**

- Newborns with RAG1 SCID have extremely low levels of B and T cells and a severe risk of recurrent, life-threatening infections. RAG1 is an essential enzyme specifically and temporarily expressed in the early development of T and B cells, making traditional gene therapy approaches challenging due to the need for tight and precise spatio-temporal expression control. Using Collectis' TALEN<sup>®</sup> technology and HSCs, Professor Cathomen engineered HSCs with a corrected copy of RAG1 that replaced the existing, mutated copy of RAG1. The precise replacement of the mutated gene enables the corrected RAG1 to be expressed at its natural timing and stage of cell development.

##### **Hyper IgE syndrome**

- Hyper IgE syndrome is characterized by high levels of IgE and is often accompanied by eczema, recurrent skin abscesses and lung infections, and a high number of eosinophils in the blood. A mutation in the transcription factor STAT3 has been associated with the most common form of this disease. Collectis has developed a strategy applicable in HSCs and T-cells, to insert a corrected version of the STAT3 gene into the patient's genome to restore its functionality.

### **Licensed Allogeneic CAR T-Cell Development Programs**

#### ***ALLOGENE/SERVIER: ALLO-501 and ALLO-501A in patients with relapsed/refractory non-Hodgkin lymphoma (r/r NHL)***

- Allogene presented updated data from the ongoing Phase 1 ALPHA (ALLO-501) and ALPHA2 (ALLO-501A) trials in relapsed/refractory non-Hodgkin lymphoma (NHL) at their CD19 Forum in May and the Annual Meeting of the American Society of Clinical Oncology (ASCO) in June.

- Data from the ALPHA trial supports the ability of a single administration of ALLO-501 to generate deep and durable responses at a rate that is similar to approved autologous CAR T therapies. Interim Phase 1 ALPHA2 data demonstrated a comparable efficacy and safety profile for ALLO-501A relative to ALLO-501.
- ALLO-501 and ALLO-501A demonstrated a manageable safety profile with no dose limiting toxicities or graft-vs-host disease, limited immune effector cell-associated neurotoxicity syndrome (ICANS) and cytokine release syndrome (CRS) observed.
- Next readout from this program is expected in late 2021.
- Allogene plans to collect additional data from the consolidation arms of the ALPHA and ALPHA2 studies, finalize a dose and schedule of ALLO-501A and lymphodepletion for a pivotal Phase 2 trial, and discuss the Phase 2 trial design with regulatory authorities. Pending regulatory feedback, Allogene plans to move to the Phase 2 Pivotal ALPHA2 trial at the end of 2021.

### ***ALLOGENE: ALLO-715 and ALLO-605 in patients with relapsed/refractory multiple myeloma (r/r MM)***

- Allogene’s UNIVERSAL trial, investigating ALLO-715 as a monotherapy and in combination with nirogacestat, SpringWorks Therapeutics’ investigational gamma secretase inhibitor, continues to enroll patients with relapsed/refractory MM. Updated data from the monotherapy arm of the study are anticipated in Q4 2021. In April, ALLO-715 was granted Regenerative Medicine Advanced Therapy (RMAT) designation by the U.S. Food and Drug Administration (FDA).
- The Phase 1 dose escalation portion of Allogene’s IGNITE trial evaluating ALLO-605, an anti-BCMA TurboCAR T cell therapy, began dosing patients. In June, the FDA granted ALLO-605 Fast Track designation based on the potential of ALLO-605 to address the unmet need for patients who have failed other standard MM therapies.

### ***ALLOGENE: ALLO-316 in patients with advanced or metastatic clear cell renal cell carcinoma***

- Allogene’s Phase 1 TRAVERSE trial evaluating ALLO-316, its first CAR T candidate for solid tumors, continues to progress in patients with advanced or metastatic clear cell renal cell carcinoma (ccRCC) with initial data anticipated in 2022.

Allogene’s CD19 AlloCAR T program utilizes Collectis technologies. ALLO-501 and ALLO-501A are being jointly developed under a collaboration agreement between Servier and Allogene based on an exclusive license granted by Collectis to Servier. Servier grants to Allogene exclusive rights to ALLO-501 and ALLO-501A in the U.S., while Servier retains exclusive rights for all other countries.

The anti-BCMA and anti-CD70 AlloCAR T programs, which utilize the Collectis TALEN® technology, are licensed exclusively from Collectis by Allogene and Allogene holds global development and commercial rights to these AlloCAR T programs. TurboCAR™ is a trademark of Allogene Therapeutics, Inc.

## **Partnership Updates**

### ***Sanofi***

- In May 2021, Collectis entered into a partnership agreement and a supply agreement regarding alemtuzumab, an anti-CD52 monoclonal antibody, to be used as part of the lymphodepleting regimen in certain Collectis’ sponsored UCART clinical trials.
- As part of the agreement, Sanofi will supply alemtuzumab to support Collectis’ clinical trials and the parties agreed to enter into discussions to execute a commercial supply of alemtuzumab under pre-agreed financial conditions.

## **Manufacturing Facility**

### ***Paris Manufacturing Facilities***

- The site finalized the manufacturing of plasmid starting materials and is now fully operational.
- The site is now focusing on mRNA production for our gene editing tools TALEN®.
- The site remains on track for the manufacturing of viral vectors.

### ***Raleigh GMP Manufacturing Facility***

- Two UCART training runs (from starting cells to vialled drug product) were successfully completed.
- Qualification activities for the facility, equipment and systems are nearing completion and on track for start of production mid-2021.

## **Financial Results**

The interim condensed consolidated financial statements of Collectis, which consolidate the results of Calyxt, Inc. of which Collectis is a 64.4% stockholder (as of June 30, 2021), have been prepared in accordance with International Financial Reporting Standards, as issued by the International Accounting Standards Board (“IFRS”).

We present certain financial metrics broken out between our two reportable segments – Therapeutics and Plants – in the appendices of this second quarter 2021 and first half 2021 financial results press release.

## Second Quarter and First Half 2021 Financial Results

**Cash:** As of June 30, 2021, Collectis, including Calyxt, had \$257 million in consolidated cash, cash equivalents, current financial assets and restricted cash of which \$238 million are attributable to Collectis on a stand-alone basis. This compares to \$274 million in consolidated cash, cash equivalents, current financial assets and restricted cash as of December 31, 2020, of which \$244 million was attributable to Collectis on a stand-alone basis. This net decrease of \$17 million primarily reflects (i) \$59 million of net cash flows used in operating, investing and lease financing activities of Collectis, (ii) \$12 million of net cash flows used in operating, capital expenditures and lease financing activities of Calyxt and (iii) \$3 million of unfavorable FOREX impact which was partially offset by (iv) \$46 million of net equity proceeds raised from sales under the Company's "At-The-Market" (ATM) program in April 2021 and (v) \$11 million of proceeds from stock options exercises at Collectis. We believe that the consolidated cash, cash equivalents, current financial assets and restricted cash position of Calyxt as of June 30, 2021 will be sufficient to fund its operations into the second half of 2022, while amounts attributable to Collectis will be sufficient to fund Collectis operations into early 2023.

**Revenues and Other Income:** Consolidated revenues and other income were \$15 million for the three months ended June 30, 2021, of which \$13 million was attributable to Calyxt, compared to \$5 million for the three months ended June 30, 2020. Consolidated revenues and other income were \$43 million for the six months ended June 30, 2021, compared to \$56 million for the six months ended June 30, 2020. 57% of consolidated revenues and other income was attributable to Collectis in the first half of 2021. This decrease between the six months ended June 30, 2021 and 2020 was mainly attributable to a \$28 million upfront payment received in March 2020 and the recognition of \$19 million of other previously-received upfront and milestone payments on the five released targets based on the March 2020 amendment of the License, Development and Commercialization Agreement signed with Servier. That was partially offset by (i) the recognition of \$15 million in Cytovia stock or an upfront non-cash payment of \$15 million if certain conditions are not met by December 31, 2021, (ii) the recognition of a \$5 million milestone payment from Allogene related to the Phase 1 clinical study for ALLO-316, in advanced or metastatic clear cell renal cell carcinoma and by (iii) \$17 million from higher high oleic soybean revenues at Calyxt

**Cost of Revenues:** Consolidated cost of revenues were \$12 million for the three months ended June 30, 2021 compared to \$6 million for the three months ended June 30, 2020. Consolidated cost of revenues was \$20 million for the six months ended June 30, 2021 compared to \$10 million for the six months ended June 30, 2020. This increase was primarily explained by the cost of products sold during the period by Calyxt.

**R&D Expenses:** Consolidated R&D expenses were \$31 million for the three months ended June 30, 2021 compared to \$23 million for the three months ended June 30, 2020. Consolidated R&D expenses were \$62 million for the six months ended June 30, 2021 compared to \$44 million for the six months ended June 30, 2020. 91% of consolidated R&D expenses was attributable to Collectis in the first half of 2021. The \$19 million increase between the first half of 2021 and 2020 was primarily attributable to (i) higher wages and salaries and social charges on stock option grants of \$8 million and to (ii) higher purchases, external and other expenses of \$11 million which was partially offset by lower non-cash stock-based compensation expenses of \$0.5 million.

**SG&A Expenses:** Consolidated SG&A expenses were \$9 million for the three months ended June 30, 2021 compared to \$9 million for the three months ended June 30, 2020. Consolidated SG&A expenses were \$18 million for the six months ended June 30, 2021 compared to \$21 million for the six months ended June 30, 2020. 59% of consolidated SG&A expenses was attributable to Collectis in the first half of 2021. The \$3 million decrease was attributable to lower non-cash stock-based compensation expenses of \$5 million which was partially offset by higher wages and salaries and social charges on stock option grants of \$2 million.

**Net Income (loss) Attributable to Shareholders of Collectis:** The consolidated net loss attributable to shareholders of Collectis was \$40 million (or \$0.88 per share) for the three months ended June 30, 2021, of which \$37 million was attributed to Collectis, compared to \$32 million (or \$0.76 per share) for the three months ended June 30, 2020, of which \$25 million was attributed to Collectis. The consolidated net loss attributable to Shareholders of Collectis was \$52 million (or \$1.17 per share) for the six months ended June 30, 2021, of which \$43 million loss was attributed to Collectis, compared to a loss of \$12 million (or \$0.29 per share) for the six months ended June 30, 2020, of which \$3 million income was attributable to Collectis. This \$40 million increase in net loss between first half 2021 and 2020 was primarily driven by a decrease in revenues and other income of \$14 million and by an increase in operating expenses of \$25 million.

### **Adjusted Net Income (Loss) Attributable to Shareholders of Collectis:**

The consolidated adjusted net loss attributable to shareholders of Collectis was \$36 million (or \$0.80 per share) for the three months ended June 30, 2021, of which \$34 million is attributed to Collectis, compared to a net loss of \$29 million (or \$0.68 per share) for the three months ended June 30, 2020, of which \$23 million was attributed to Collectis. The consolidated adjusted net loss attributable to Shareholders of Collectis was \$48 million (or \$1.08 per share) for the six months ended June 30, 2021, of which \$38 million loss was attributable to Collectis, compared to a loss of \$4 million (or \$0.09 loss per share) for the six months ended June 30, 2020, of which \$8 million income was attributable to Collectis. Please see "Note Regarding Use of Non-GAAP Financial Measures" for reconciliation of GAAP net income (loss) attributable to shareholders of Collectis to adjusted net income (loss) attributable to shareholders of Collectis.

We currently foresee focusing our cash spending at Collectis for the Full Year of 2021 in the following areas:

- Supporting the development of our pipeline of product candidates, including the manufacturing and clinical trial expenses of UCART123, UCART22, UCARTCS1 and new product candidates, and
- Operating our state-of-the-art manufacturing capabilities in Paris (France), and Raleigh (North Carolina, U.S.A); and
- Continuing strengthening our manufacturing and clinical departments, including hiring talented personnel.

### Note Regarding Use of Non-GAAP Financial Measures

Collectis S.A. presents adjusted net income (loss) attributable to shareholders of Collectis in this press release. Adjusted net income (loss) attributable to shareholders of Collectis is not a measure calculated in accordance with IFRS. We have included in this press release a reconciliation of this figure to net income (loss) attributable to shareholders of Collectis, which is the most directly comparable financial measure calculated in accordance with IFRS. Because adjusted net income (loss) attributable to shareholders of Collectis excludes Non-cash stock-based compensation expense—a non-cash expense, we believe that this financial measure, when considered together with our IFRS financial statements, can enhance an overall understanding of Collectis’ financial performance. Moreover, our management views the Company’s operations, and manages its business, based, in part, on this financial measure. In particular, we believe that the elimination of Non-cash stock-based expenses from Net income (loss) attributable to shareholders of Collectis can provide a useful measure for period-to-period comparisons of our core businesses. Our use of adjusted net income (loss) attributable to shareholders of Collectis has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our financial results as reported under IFRS. Some of these limitations are: (a) other companies, including companies in our industry which use similar stock-based compensation, may address the impact of Non-cash stock-based compensation expense differently; and (b) other companies may report adjusted net income (loss) attributable to shareholders or similarly titled measures but calculate them differently, which reduces their usefulness as a comparative measure. Because of these and other limitations, you should consider adjusted net income (loss) attributable to shareholders of Collectis alongside our IFRS financial results, including Net income (loss) attributable to shareholders of Collectis.

#### RECONCILIATION OF IFRS TO NON-IFRS NET INCOME – Second quarter (unaudited)

(\$ in thousands, except per share data)

	For the three-month period ended June 30,	
	2020	2021
<b>Net income (loss) attributable to shareholders of Collectis</b>	<b>(32,263)</b>	<b>(39,919)</b>
Adjustment:		
Non-cash stock-based compensation expense attributable to shareholders of Collectis	3,441	3,635
<b>Adjusted net income (loss) attributable to shareholders of Collectis</b>	<b>(28,823)</b>	<b>(36,284)</b>
<b>Basic Adjusted net income (loss) attributable to shareholders of Collectis (\$/share)</b>	<b>(0.68)</b>	<b>(0.80)</b>
<b>Weighted average number of outstanding shares, basic (units) (1)</b>	<b>42,472,490</b>	<b>45,461,310</b>
<b>Diluted Adjusted net income (loss) attributable to shareholders of Collectis (\$/share) (1)</b>	<b>(0.68)</b>	<b>(0.80)</b>
<b>Weighted average number of outstanding shares, diluted (units) (1)</b>	<b>42,512,372</b>	<b>45,461,310</b>

(1) When we have adjusted net loss, in accordance with IFRS, we use the Weighted average number of outstanding shares, basic to compute the Diluted adjusted net income (loss) attributable to shareholders of Collectis (\$/share). When we have adjusted net income, in accordance with IFRS, we use the Weighted average number of outstanding shares, diluted to compute the Diluted adjusted net income (loss) attributable to shareholders of Collectis (\$/share)

#### RECONCILIATION OF IFRS TO NON-IFRS NET INCOME – First six months (unaudited)

(\$ in thousands, except per share data)

	For the six-month period ended June 30,	
	2020	2021
<b>Net income (loss) attributable to shareholders of Collectis</b>	<b>(12,221)</b>	<b>(51,787)</b>
Adjustment:		
Non-cash stock-based compensation expense attributable to shareholders of Collectis	8,296	4,233
<b>Adjusted net income (loss) attributable to shareholders of Collectis</b>	<b>(3,924)</b>	<b>(47,554)</b>
<b>Basic Adjusted net income (loss) attributable to shareholders of Collectis (\$/share)</b>	<b>(0.09)</b>	<b>(1.08)</b>
<b>Weighted average number of outstanding shares, basic (units) (1)</b>	<b>42,469,080</b>	<b>44,163,914</b>
<b>Diluted Adjusted net income (loss) attributable to shareholders of Collectis (\$/share) (1)</b>	<b>(0.09)</b>	<b>(1.08)</b>
<b>Weighted average number of outstanding shares, diluted (units) (1)</b>	<b>42,499,826</b>	<b>44,163,914</b>

(1) When we have adjusted net loss, in accordance with IFRS, we use the Weighted average number of outstanding shares, basic to compute the diluted adjusted net income (loss) attributable to shareholders of Collectis (\$/share). When we have adjusted net income, in accordance with IFRS, we use the Weighted average number of outstanding shares, diluted to compute the Diluted adjusted net income (loss) attributable to shareholders of Collectis (\$/share)

## About Collectis

Collectis is a gene editing company, developing first of its kind therapeutic products. Collectis utilizes an allogeneic approach for CAR-T immunotherapies in oncology, pioneering the concept of off-the-shelf and ready-to-use gene-edited CAR T-cells to treat cancer patients, and a platform to make therapeutic gene editing in hematopoietic stem cells for various diseases. As a clinical-stage biopharmaceutical company with over 21 years of expertise in gene editing, Collectis is developing life-changing product candidates utilizing TALEN<sup>®</sup>, its gene editing technology, and PulseAgile, its pioneering electroporation system to harness the power of the immune system in order to treat diseases with unmet medical needs.

As part of its commitment to a cure, Collectis remains dedicated to its goal of providing life-saving UCART product candidates for multiple cancers including r/r AML), r/r B-ALL and r/r MM. .HEAL is a new platform focusing on hematopoietic stem cells to treat blood disorders, immunodeficiencies and lysosomal storage diseases.

Collectis headquarters are in Paris, France, with locations in New York, New York and Raleigh, North Carolina. Collectis is listed on the Nasdaq Global Market (ticker: CLLS) and on Euronext Growth (ticker: ALCLS). For more information, visit [www.collectis.com](http://www.collectis.com).

Follow Collectis on social media: @collectis, LinkedIn and YouTube.
